

Web TimeSheet 5.7

Staff Quick Guide

The login screen displays the 'Web TimeSheet 5.7' logo at the top. Below it are two input fields: 'Login Name:' with the text 'nrichards' and 'Password:' with a masked password. An 'Enter' button is positioned below the password field. At the bottom, there is a checkbox labeled 'Remember my Login Name and Password' which is currently checked.

1. Go to the TimeSheet URL and log in.

The Timesheet screen for 'Nicolas Richards' shows the date range '22 January 05 - 28 Janu...'. It contains a table with columns for 'Task', 'Phase', and days of the week (S 22, S 23, M 24). The first row shows 'dealFX 2.0' under Task and '06. Dev' under Phase, with a time entry of '8.00' for Monday. Below the table are buttons for 'Add / Remove Tasks' and 'Add Time Off', and a 'Total' row showing '0.00' for Saturday and Sunday, and '8.00' for Monday.

2. You are placed in the **Timesheet** screen. If not, click the Timesheet icon at the top.

A dropdown menu for the 'Task' column is open, showing a list of tasks: '01. Scope', '02. Specs', '03. Mgmt/Plans', '04. PSIG Docs', '05. Tech Design', '06. Dev', '07. Rework', '08. Test', '09. Installation', and '10. Support'. The '05. Tech Design' option is highlighted by the mouse cursor.

3. Select the appropriate project from the **Task** list, and then make sure you select the correct **Phase** of the project (see back page)

The Timesheet screen shows the date 'T 18' (Tuesday). The time entry for this day is '8.00'.

4. For each day that week you worked on that project/phase, type your hours.

A blue button with the text 'Add / Remove Tasks' and a hand cursor icon pointing to it.

5. If your project is not shown, click the **Add / Remove Tasks** button.

A list of available projects/tasks is shown, including 'CMD 2.1', 'CTC 1.3', 'Cash Equities RAD TC', 'reports', 'Credit Curves 2.1', 'Credit Portal 1.9.6', and 'Dev Freight 1.2'. The 'Credit Portal 1.9.6' option is selected. Navigation buttons '>>' and '<<' are on the right.

6. Check the project(s) to add, and click the >> button. Then click **Save**. Now you can add time for those projects.

A blue button with the text 'Add Time Off' and a hand cursor icon pointing to it.

7. If you have time off to record, click the **Add Time Off** button.

A dropdown menu for 'Time Off' is open, showing options: '.Vacation/Leave*', 'Bereavement*', 'Office Closed*', and 'Half-staff*'. The 'Office Closed*' option is highlighted by the mouse cursor.

8. Select the reason you had time off from the list box, and then enter hours for that day(s).

A blue button with the text 'Save' and a hand cursor icon pointing to it.

9. When you are done, click the **Save** button at the bottom of the screen.

A blue button with the text 'Submit' and a hand cursor icon pointing to it.

10. Click the **Submit** button to submit your time for your manager's review.

FAQs

How much time do I put in TimeSheet?

You should put in the actual hours you work. At minimum, you should account for a 40-hour work week. If you work more hours, put in those hours. If you work less than 40, the missing hours should be accounted for under training, holiday, vacation, sick or similar.

What if I'm working from home? nights? weekends?

All of those hours – if you are performing work for – should be put in. If you are working from home, make sure the Loc field (near the Comments field at the bottom) is set to “Home.”

When should I enter my time?

Either daily at the end of each day, or at the end of the day on Friday for that entire previous week.

What should I put in the comments box?

Give informative details. For example, “meetings” is not informative enough. Instead write something such as “meeting to understand product defaults and user group views.”

Where do I put departmental meetings?

Departmental meetings enable you to be informed so that you can be working effectively on the projects you support. Thus, you should allocate the time spent in departmental meetings to the projects on which you were primarily working on that week.

Where do I put general team status meetings?

Same as above. These meetings enable you to effectively work on your projects, either informing management or informing you. Allocate them to the projects which are relevant to the topics discussed at the meeting.

What increment of time should I report in?

A half-hour is the smallest necessary. Most people can report in hourly time slots.

How do I record “admin” activities?

There are no “admin” buckets. If you are in meetings, you are probably doing so as part of a set of projects you're working on. Allocate the time either to the majority project, or use your judgement.

General Reminders

- The URL is <http://ldwebtimesheet.ad.com/cgi/rt.exe>
- Make sure you record the time spent on each project you are working on.
- Do not record something as “training” unless you are going on formal training. Coming up to speed on a project is part of being on that project and should be recorded as such.

Project Phase Usage

It is important to use the correct phase for project work. Use this list as a guideline for which phase to use:

- | | |
|-------------------------|---|
| 01 Scope | Project Scoping: Requirements gathering / presales initial scope doc, prototyping. |
| 02 Specs | Project Specification: Writing the project specification doc or other participation in the specification phase, such as functionality review, product comparisons, or functional specification walk-throughs. |
| 03 Mgt/Plans | Project Management: Client meetings, project management issues. |
| 04 Documentation | All other documentation other than spec and scope docs. |
| 05 Tech Design | Design work that comes before coding. |
| 06 Development | Coding |
| 07 Rework | Bug fixing, free modifications, changes to the documentation, any rework efforts. |
| 08 Testing | Testing of the code and system. QA work. Working on Ats. |
| 09 Installation | Integration: Installation and training support, and any client site visit. |
| 10 Support | Any support issues once the product has been installed. |
