A. Introduction

This user manual explains how to use the Resource Map feature in the PAXX system. This feature was designed to help Line Managers, Project Managers and Project Portfolio Managers review, assign, and update resources assigned to project(s). You can get a project-level view or a user-level view of the resource allocation. PAXX makes it easy to search a specific project, or you can drill down from a line manager level to the resources assigned to that manager. Once you are viewing a resource summary on the screen, you can then update or add allocation details to projects.

This user manual is divided into the following chapters:

- **Chapter II, Getting Started**

This chapter explains how to load PAXX in your browser and how to log into the system.

- **Chapter III, Using the Resource Map Screen**

This chapter describes how to view, add or update resource allocation.

- **Chapter IV, Searching**

This chapter shows how to search for resources via Project ID or Name, Resource Name, or Line Manager.

B. Note About Project Access Rights

PAXX is designed to give you access to add resources to existing projects or add projects to existing resources and then to update the resource allocation for that project or resource. However in order to be able to do so, you must have access rights to the project or resource in question.

As you will learn in Chapter III, PAXX will give you the ability to view your own allocation page. You also have the ability, described in Chapter IV, to drill down to a specific project or resource and then make changes to those resource allocations *but only if you have the access rights to do so*.

In general within PAXX, there is a hierarchy that is followed when determining access rights to resources. A Project Portfolio Manager (PPM) can update all projects / resources of the Line Manager(s) assigned to them. A Project Manager, in contrast, would only be able to update all projects under his / her reporting Line Manager. There are also a few special users, called Super Users, who have been granted access rights to all projects and resources.

This hierarchy is shown in *Figure 1* below.

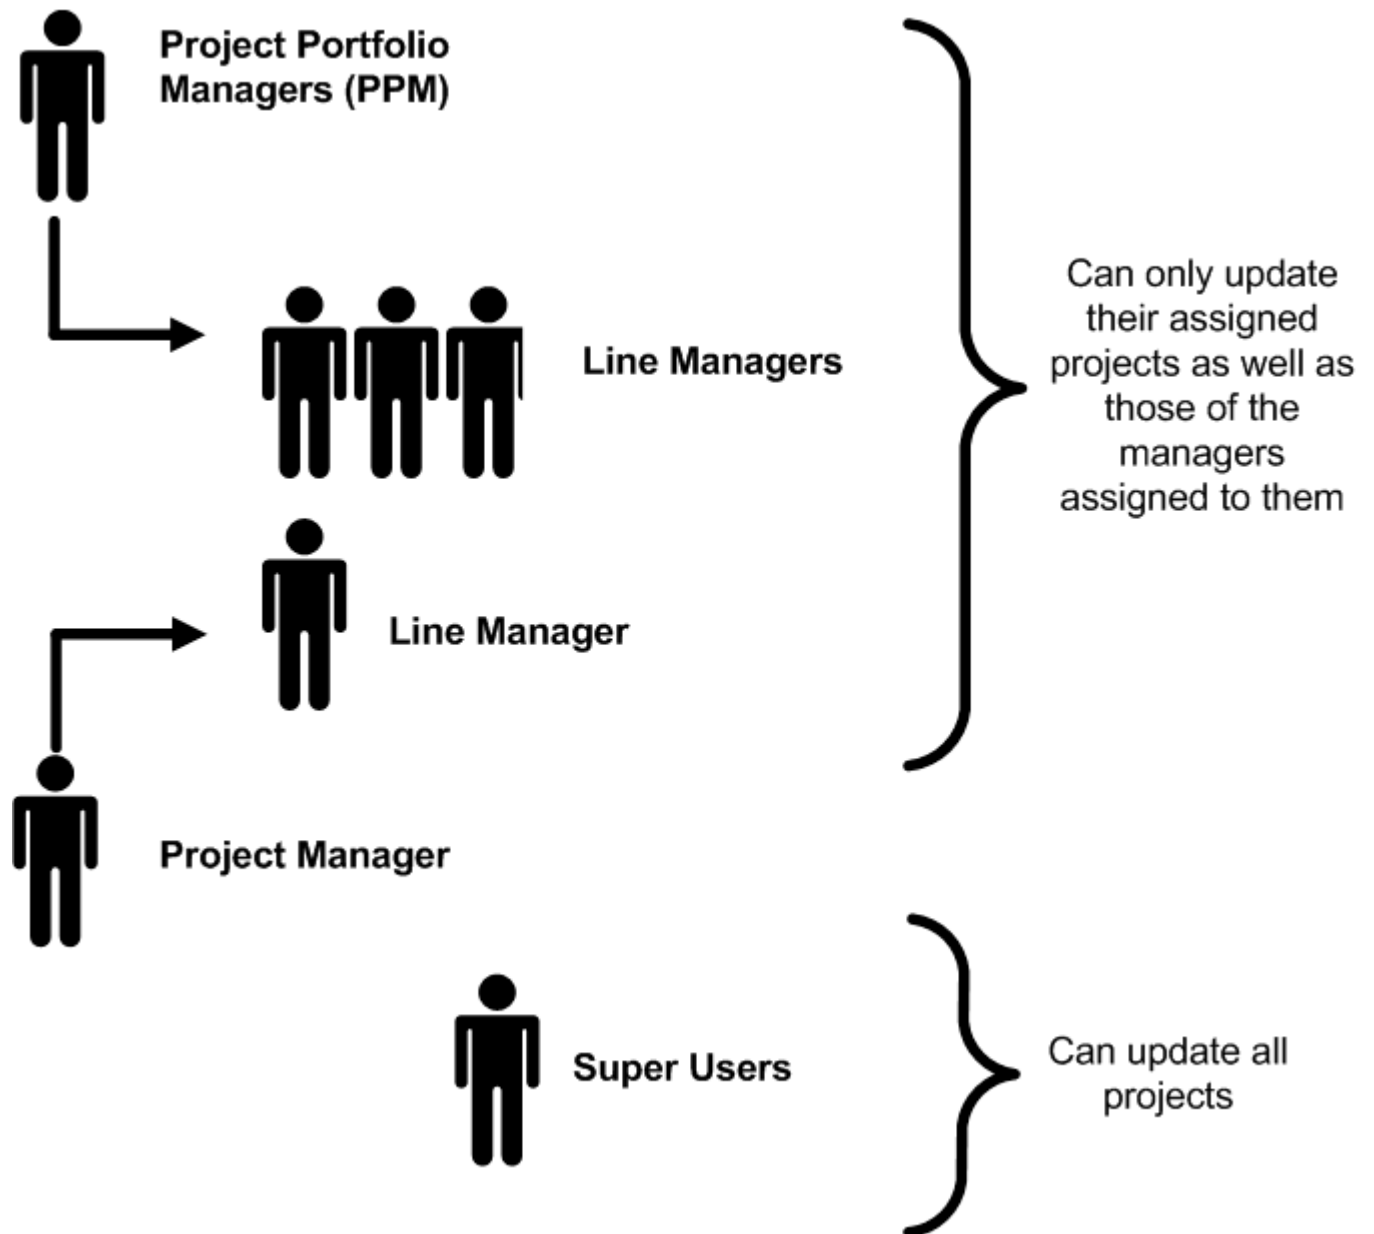

Figure 1: Permission Hierarchy Within PAXX

Keep this in mind as you go through the PAXX system. If you are viewing the resource allocation screen for a particular project or user and you think you should be able to update this allocation information, yet the screen does not give you that option, there might be a permission issue. Please contact **#PAXX Support** if you think access should be granted to you.

A. Overview

This chapter explains how to access the PAXX application, how to log in, and how to access the main resource screen.

B. Starting PAXX

To start PAXX, run a new internet browser window and type the following URL and then hit Enter:

<http://whfitest1/fixed income development/PAXX/default.asp>

This will bring up the PAXX login window. Please type your SNACS ID in order to log in:

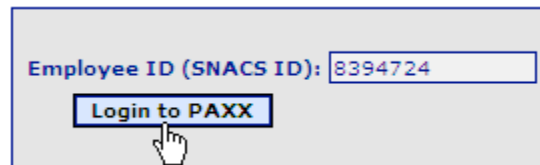

A screenshot of the PAXX login window. It features a text input field labeled "Employee ID (SNACS ID):" containing the value "8394724". Below the input field is a button labeled "Login to PAXX". A mouse cursor is pointing at the button.

Figure 2: Login Window

If your SNACS ID has not yet been set up for PAXX access, you will see an error message:

A screenshot of an error message box. The text inside the box is "This Login Cannot be Found. Please Contact The Software Administrator." in red font.

Figure 3: Invalid Login

If you see this message even though you are sure you have entered your SNACS ID correctly, please contact **#PAXX Support** or your manager about getting PAXX access.

Once you have successfully logged in, you will see the opening PAXX screen:

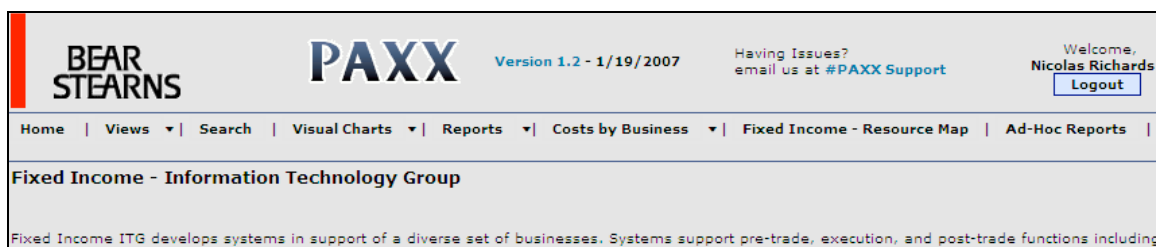

Figure 4: Opening PAXX Screen

In order to actually see project resources, you have to click on the **Fixed Income – Resource Map** link in the upper-right part of the screen, as seen in the figure above. Click that link:

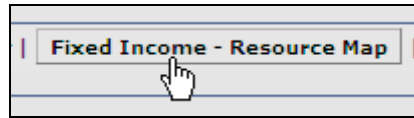

Figure 5: Selecting the Resource Map Screen

After you click the link, it is possible you will see a wait message as shown below:

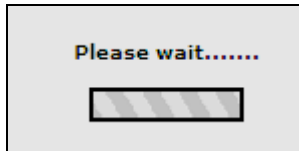

Figure 6: The Wait Message

If you see this message while using PAXX, it just means the system is loading data in order to refresh the screen with what you have requested. Just be patient and the screen will usually reload in just a few seconds. This message is normal.

The next chapter will discuss the functionality of the Resource Map screen.

III. USING THE RESOURCE MAP SCREEN

A. Overview

This chapter explains the functionality of the main Resource Map screen. You will learn how to view and update resources assigned to a project.

B. Viewing Resources

After you have logged in to PAXX and clicked the **Fixed Income – Resource Map** link, you will see the central Resource Map screen:

Figure 7: Main Resource Screen

This is the screen that will serve as the starting point for your activity, and it is the screen you can return to after making updates in order to see your updates reflected in the summary totals.

As you can see in *Figure 7* above, the Resource Map screen shows you the projects you, as the resource who is currently logged in, are assigned and how much of your time has already been allocated to those projects. For example, the user above is assigned to two different projects in *Figure 7* (10001 and 16360) and has 13% of his time allocated to each project in March 2007 and 12% of his time allocated to each project in April 2007. No other time is allocated for the rest of the year. Underneath the project-specific summaries are the resource totals. These rows are

highlighted, and they show in the example above that 26% and 24% of the resource's time has been allocated for March and April of 2007.

The screen also shows the Total Projected Monthly Cost in dollars and the Total Projected Monthly Hours allocated, as well as the Total Projected Cost in dollars and the Total Projected Hours. These totals are sums of the project-specific totals and merely reflect what has been entered into the system up until now.

This screen also shows search fields for searching for Project ID/Name, Resource Name, or Line Manager. These will be explained in Chapter IV.

C. Updating Resource Allocations

As already seen, the Resource Map screen allows you to see all of the allocations for a resource to various projects. What if you want to change these allocations or add new ones? If you want to enter new resource allocation information, click the **Update Resource map** button in the upper-left part of the Resource Map screen:

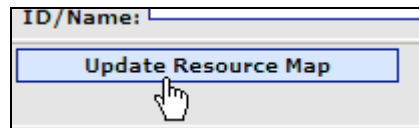

Figure 8: Selecting the Update Resource Map Button

When you click that button, the screen will refresh to show text entry fields where you can change the resource allocation information, as seen in *Figure 9* on the next page.

If you do not see the **Update Resource Map** button on your screen, you are not viewing a resource for which you have permission to make changes. If you think this is incorrect, please contact **#PAXX Support** to report this (see Chapter I, section B for more details about resource access permission).

Save and Exit
Exit Without Saving

Search and Add Projects by ID/Name:

Please Enter The Projected Percentage of Time As A Non-Negative Integer (ex. 0,10,13,15) For Each Resource and Click 'Save and Exit'.

Resource Name	Project ID	Project Name	GL Code	GL Desc	Project Class	Portfolio Status	Mar-07	Apr-07	May-07	Jun-07	Jul-07	Aug-07	Sep-07
Richards, Nicolas	10001	General Management and Admin	001AV	General Admin Tasks	GMA	In-Progress - GMA	13	12	15	0	0	0	0
Richards, Nicolas	16360	FI ITG Support Activities	003BL	FI ITG SUPPORT ACTIVITIES	BU Support	In-Progress - BU SUPT	13	12	0	0	0	0	0
Total for Richards, Nicolas							26%	24%	15%	0%	0%	0%	0%

Actuals for the last 6 months

Resource Name	Project ID	Project Name	GL Code	GL Desc	Project Class	Portfolio Status	Sep-06	Oct-06	Nov-06
Actuals Not Available									

Figure 9: The Update Resource Screen

Note how the resource allocation fields above have now become text-entry fields. With these text-entry fields you can now add new allocations to a field with a zero, or you can overwrite existing text to change a current allocation. For example, assuming you wish to assign 15% of the user's time to Project 10001 for May 2007. Click the mouse in the **May-07** text-entry field and type "15":

Figure 10: Updating a Field

Please note that just typing this in the field is not enough to cause the system to be updated. After you have typed the correct allocation percentage in however many text fields you wish to update, you must click the **Save and Exit** button in order for your changes to become permanent:

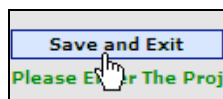

Figure 11: Saving and Exit

If for whatever reason you wish to exit this screen without your updates being saved, you can click the **Exit Without Saving** button instead.

Once you have saved your changes, the Resource Map screen will be updated to reflect your changes. Using the same example as above, if the May 2007 allocation was changed to 15% and the information was saved, the new allocation will be shown on the screen:

acts	(Percent
07 May-07 J	
15%	0
0%	0
15%	0
43 \$4,347	3
24	0

Figure 11: The Updated Resource Shown on Screen

When you have completed assigning or updating resource allocation, the total line should indicate 100% to show full allocation. If it does not add up to exactly 100%, either by being over 100% to show over allocation or by being under 100% to show under allocation, the number will be highlighted in red (as it is in the example shown in *Figure 11* above).

Note the totals for your resources and make sure they are totaling correctly at this screen.

D. Project Metrics

Whenever you are viewing a project resource summary screen, you will be able to see project metrics in the upper-right part of the screen:

Metrics			
Budgeted Hours	Total Hours Booked	Projected Hours	Available Hours
0	12,008	7,302	-19,310
Compromised Status:	On Time and On Budget		

Figure 12: Project Metrics

As you can see in the example shown in *Figure 12* above, the project metrics show total budgeted hours, total hours booked, projected hours, and available hours. In the example shown above, total hours books has already exceeded the number of hours that had been projected for the project, and thus the available hours number is negative and marked in red.

There is also a notation for PMO status (compromised status), in this case shown in green and marked as On Time and On Budget. If this were to go over budget, the status would change to indicate that.

Also note that when you are looking at a resource map screen, if a resource has been assigned to a project past the planned end date of that project as entered in the Business Case, it will show up highlighted in yellow:

y B.	17323	BO Support for XTrader for Futures	00332	FUTURES ADMINISTRATION	MS SYS	In Progress - MS SYS	4%	4%	4%	4%
y B.	18673	Outsource Xtrader Environment to TT-Net	00532	FUTURES ADMINISTRATION	Development In Progress	In Progress	5%	5%	5%	5%

Figure 13: Resource Past Allocation Highlighted

There will also be a footnote on the screen explaining the highlighted number and telling you to revise the business case to extend the planned end date to match the allocation:

The resources have been allocated beyond the project planned end date. Please revise the business case to extend the planned end date

Figure 14: Resource Past Allocation Warning Message

E. Adding a Project to a Resource

As shown in the upper left part of *Figure 9* above, there is also a way to add a new project to be assigned to a specific resource. For example, the user above was assigned to two different projects. What if you want to add another project to this user? For that you can use the text box labeled **Search and Add Projects by ID/Name** in the upper-left part of the screen seen in *Figure 9*.

To add a new project, start typing a project ID or name and matching projects will show up on the screen. When you see the project you wish to add, click its blue link and it will add that project to the resource:

Save and Exit

Exit Without Saving

Search and Add Projects by ID/Name: 1000

Figure 15: Adding a Project

When you add a project, the screen will refresh and the new project should be seen assigned to that resource. Now you can enter new resource allocation information for that project as already explained in this chapter.

A. Overview

This chapter explains how to search for all resources assigned to a line manager, or to a specific project. Once you find the resource you are searching for, you can then update the allocations for that resource (see *Chapter III* for details on updating resource allocations).

B. Searching by Line Manager

On the main Resource Map screen, there is the ability to see resources attached to a specific Line Manager. To see this resource list, select the Line Manager's name from the **Line Manager** drop-down list box:

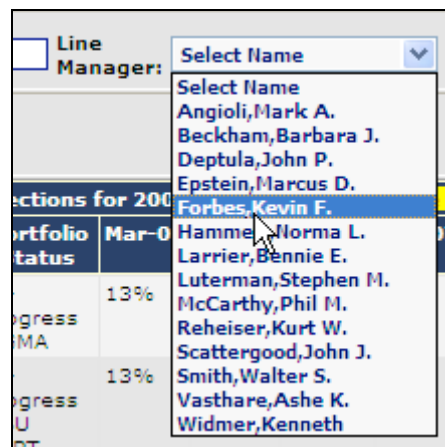

Figure 16: Selecting a Line Manager

When you select a name, the screen will refresh and then show you a Resource Map screen that shows only those resources assigned to the Line Manager you selected.

In *Figure 17* on the next page, you can see an example of what this screen looks like.

Project ID/Name:		Resource Name:		Line Manager: Forbes, Kevin F. v

Figure 17: All Resources for the Line Manager

Here you see all the resources assigned to the Line Manager you selected. This is a summary page that gives you overall information for each resource, first broken down by resource and then summarized across all projects in the rows marked in yellow. Now how total allocations for a monthly column that do not add up to exactly 100% are marked in red, as seen in *Figure 17* above.

From this screen you can get detailed information for any specific resource by clicking their highlighted name as a link, as shown in *Figure 18* below:

Resource Name	Project ID	Project Name
Richards, Nicolas	10001	General Management and Admin

Click to View Resource Profile i.e, Actual Charges, Projected Charges, PA etc

Figure 19: Resource Details Screen

Note the details about the resource above, and the project summaries assigned to that resource below, including total allocation numbers on a month-by-month basis.

While you are on this screen, it is possible to jump directly to another resource. Using the drop-down list box in the upper left part of the screen, select a different resource:

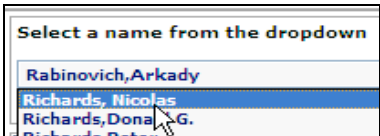

Figure 20: Selecting a Different Resource

C. Searching by Project ID/Name

On the main Resource Map screen, there is the ability to see details about a specific project by typing that project name or ID directly. To see this, start typing the project ID number or name in the appropriate text box above the **Update Resource Map** button on the screen. As you type, the system starts searching for any project that matches what you have typed so far:

Figure 21: Search by Project ID or Name

When you see the project (or resource) you want, click its blue-highlighted link:

Project ID/Name: Resource Name:

Resource Name	Project ID	Project Name

[Click here to view the actuals for the last 6 month](#)

Figure 24: Updating Resources for a Project

As you can see in *Figure 24* above, you can now edit resource allocation percentages for each resource allocated to that project. The monthly columns now contain editable text boxes. Type over the contents of a text box to enter new allocation information.

If you want to delete a resource from this project, click the  link next to the resource name (as demonstrated in *Figure 24* above). When you do, a browser warning box will pop up to verify this is what you really want to do:

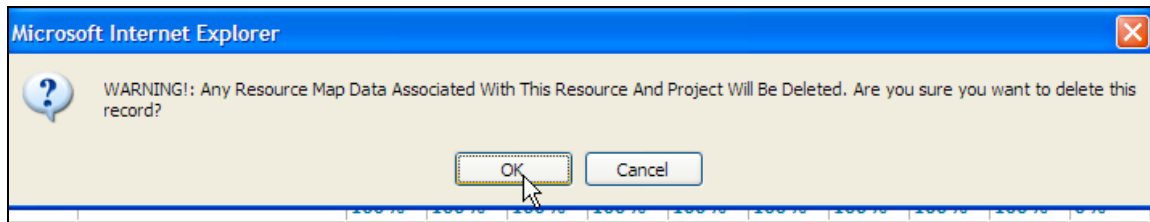

Figure 25: Deletion Warning

If you clicked the link by mistake, click on the **Cancel** button to prevent the deletion. Otherwise click the **OK** button to confirm the deletion.

You will also notice in *Figure 24* above that underneath each editable text box is a blue-highlighted link that shows a percentage. As seen in *Figure 26* below, if you move the mouse cursor over one of those links it tells you that you can click the link to view resource allocation for the resource on that row:

		ACTIVITIES	100%	100%	100%

Note that whenever you are on a resource detail screen, you have the ability to export the screen data to Excel by clicking the **Export to Excel** link in the upper-left part of the screen as shown above in *Figure 30*.

V. ADDING PROJECTS AND RESOURCES

A. Adding Projects

The current resource map has projects which are already registered with NIKU with NIKU IDs assigned by PMO and as well as dummy projects which are not registered with NIKU. These unregistered projects are created as place holder projects for budgeting purposes and / or projecting an unplanned / unbudgeted project for certain business need.

If you need to create such dummy projects for resource allocation, please follow this procedure:

1. Email **#PAXX Support** with the following information:
 - Project Name
 - Project Manager
 - Line Manager
 - GL Code
 - Project Class (ex: M&S, BU Supp or A-F and G-H)
 - Budget Type (ex: Baseline for current fiscal year, Unplanned, reference project)
2. Someone from Paxx support team will set up this project and respond with a temporary project ID
3. Use this temporary project ID to allocate the resources.

B. Adding Resources

If you need to have a resource added to the paxx resource map, please follow this procedure:

1. Email **#PAXX Support** with the following information:
 - Resource Name
 - Line Manager
 - Cost Center
 - Product Area Number
 - Product Area
 - CxO: (ex: Fixed Income, EMC or BSRM)
 - Resource Type (ex: FTE, Consultant, Offshore and Onshore)
 - Resource Budget Type (ex: Baseline for current fiscal year or ATL)

2. Someone from Paxx support team will create a user profile and respond with the appropriate information.
3. Use that information to assign projects to this newly created resource profile.
